**Helle Sorensen : International Air Fares: Construction and Ticketing** before purchasing it in order to gage whether or not it would be worth my time, and all praised International Air Fares: Construction and Ticketing:

This worktext helps students master a skill in demand-international fare assessment. Students learn to prepare fare construction charts and fare calculation ladders by reading and interpreting air tariffs, mileage, and international rules and regulations. It provides numerous illustrations to better understand the concepts. The worktext builds on the knowledge students learned in domestic ticketing and focuses on what is new when constructing international airfares.
