**ISO TC 39/SC 4 : ISO 7008:1983, Woodworking machines -- Single blade circular saw benches with or without travelling table -- Nomenclature and acceptance conditions** before purchasing it in order to gage whether or not it would be worth my time, and all praised ISO 7008:1983, Woodworking machines -- Single blade circular saw benches with or without travelling table -- Nomenclature and acceptance conditions:

Specifies the geometrical test for these sawing machines, and gives the corresponding permissible deviations which apply to machines for general purpose use and normal accuracy. Gives also the terminology appropriate to each part of

the machine (in English, and French as well as the equivalent terms in German, Spanish, Italian and Swedish). It deals only with the verification of accuracy of the machine. It does not apply to the testing of the running of the machine, nor to machine characteristics which should generally be checked before the accuracy is tested. Does not impose any practical test. This title may contain less than 24 pages of technical content.
