A must-read for expatsBy Laura BesleyThe first paragraph of Dr. Cathy Tsang-Feign's *Keep Your Life, Family and Career Intact While Living Abroad* (third edition, revised and expanded) is as concise, true and informative as the rest of her book:"There is a lot of romance associated with living abroad. It is often seen as a life of glamour, of white suits and high tea on palm-shaded verandas, chauffeurs and servants and dinners with diplomats, with no problems in store other than a touch of culture shock." (Foreword)Culture Shock, Dr. Tsang-Feign says is "better defined as acculturation, [...] a process which can last from six months to more than a year." The process is broken up into four easy-to-understand steps: Elation - "When first in a foreign country, one finds it quite stimulating that most things are so unlike back home." Resistance - "Frequent comparisons between home and the host country make everything back home seem so much better." Transformation - "Individuals feel more familiar with the environment and begin to see the good side of the host country." Integration - "Cultural barriers are bridged."Having lived abroad for many years, both as a child and as an adult, I found this theory to be completely accurate. In my experience I have found some countries easier to settle into than others, but the overall process is the same, just slower or faster.This book is extremely insightful; it explains theories, shows real life examples and offers helpful advice and tips. I certainly wish I'd read it twenty years ago! However, I know that I can dip back in it as and when I need to. The book covers a broad range of topics, such as: 'Problems of Moving', 'Third Culture Kids', 'Stress at Work and Home' and 'All Alone and Far From Home'. I cannot recommend this book more for people living, or thinking about, living abroad.
