The good thing about this book is that along with information it gives a website to actually see a video of the roller coasters in action. My grandson is old enough to ride most roller coasters so he enjoyed thisfeature a lot.....he is just starting to read so his dad helps with the story parts.2 of

I don't like roller coasters but my brothers and my mom do and in Orlando Florida a new roller coaster is being build called the skyscraperSo I was curious and I think if you like roller coasters or if you like technology history then definitely get this.

Tired of the same old, rickety wooden roller coasters? Crave more thrills than the typical vertical loops and camelback hills found at every local amusement park? Fortunately, roller coasters come in a mind-blowing profusion of styles, shapes, and sizes. From innovative track designs to unusual seating configurations, from ridiculous locations to bizarre theming, the experience never gets old. In *The 50 Most Unique Roller Coasters Ever Built* you'll explore a roller coaster ...powered by people. ...inspired a popular computer game. ...uses a Ferris wheel as a lift. ...requires an on-board brakeman. ...where the louder you scream the faster you go. ...built on top of a skyscraper. ...known as the dog fart coaster (yes, you read that right!). *The 50 Most Unique Roller Coasters Ever Built* is a list comprised of unusual, rare, and hard to find scream machines.
