two volumes that concentrate on the eastern and western sides of this wilderness area. Each volume comes with a good map that covers the areas mentioned in the book that will assist you when you go to purchase specific maps for the area you are going to travel. It lists sites to see while paddling, good places to camp and those to avoid and describes portages in rods and detail. A must have title for true paddlers or armchair dreamers! 9 of 9 people found the following review helpful. EssentialBy D. KiviIt's hard to imagine going on a trip to the BWCAW without the appropriate Robert Beymer book. I refer to his books constantly when planning a trip, at the campsite, and even on the water; it never leaves my fanny pack except to be read. His information is clear and accurate (some of the rules have since changed). I even think his prose is pretty good. Highly recommended!

This is the first in the two-book series covering the Boundary Waters Canoe Area. Offered are descriptions of nearly 200 miles along the Canadian border and over 1200 miles of canoe routes through some of the most beautiful country in the world. This book describes several routes from each of 28 entry points, covering distance, portages, difficulty, and Fisher maps needed. This volume comes with a 4-color foldout map of the region covered.
