First off this is a book of photographs with captions. The picture quality is the best I have seen in any book of photographs that I have ever read. I just finished reading this book from the library and now will buy it. The details in each picture is the best I have seen on the printed page and the composition of each photo shows much thought on the part of the photographer. Buy this book and you will not regret it, I guarantee it. Make sure you buy a new copy to get the quality inherent in the pictures.

"A lovely volume whose simplicity and elegance accentuate rather than overshadow this visual introduction to the beauty of Canada." -Photovision
A flash of lightning explodes across a summer sky; a sudden winter storm descends on an otherwise tranquil coastal bay; in a moment of absolute stillness, the surface of a mirror-like lake reflects the world around it. The Canadian Landscape is a collection of more than 125 sweeping images by internationally acclaimed photographer J.A. Kraulis. Each stunning picture tells the tale of a vast country and of a photographer's relationship with it. The text consists of a concise introduction and short, descriptive captions that accompany each photograph. The book is organized east to west by region, covering: The Atlantic and sub Arctic regions The St. Lawrence and Great Lakes regions The Prairies The Rocky Mountains The West coast rainforests and the Pacific Ocean. The photographs capture a range of views and portray vast, uninhabited vistas of exceptional grandeur. The bilingual text and captions are in English and French.
