Stephen Frink, Bill Harrigan : The Cayman Islands: White Star Guides Diving before purchasing it in order to gage whether or not it would be worth my time, and all praised The Cayman Islands: White Star Guides Diving:

1 of 2 people found the following review helpful. Excellent Book! By J. Sterling This is the first White Star Guide book I have purchased. It is loaded with helpful information about planning your dive. There are numerous color pictures about the creatures and plants that you might expect to find in the Caymans.

With their clear waters, vertical walls, shallow coral reefs, numerous shipwrecks, and miles of pristine sandy beaches, the three islands that comprise the Caymans are uniquely suited for diving. Brimming with unique three-dimensional

maps, spectacular underwater photographs, and superb illustrations, this handy guide offers readers all the information they need to plan their underwater adventures down to the last detail. A field guide at the back of the book will help readers identify the native flora and fauna they encounter on their dives. Vetted by a corporate affiliate of PADI (Professional Association of Diving Instructors), this book is an authoritative resource for divers of all levels of experience.

About the Author Stephen Frink is director of photography for Rodale's Scuba Diving. His work has been published in such magazines as *Natural History*, *Travel Leisure*, *Islands*, *Esquire*, *Time*, *Newsweek*, *Fortune*, and *Money*, as well as numerous National Geographic publications. William Harrigan has made thousands of dives from Alaska to Australia. A graduate of Yale University with a major in marine biology, he is the former head of the National Marine Sanctuary Program.
