Bill Russo : The Ghosts of Cape Cod before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Ghosts of Cape Cod:

If you plan to visit the Cape or live there this book will help locate interesting haunted places with their ghostly stories. The story about the Pirate Capt Sam Bellamy is very interesting especially since the Pirate ship, the Whydah, sank in 1717 and was found in 1984. Add to this local lore that the Captain had a romantic relationship with a woman that became known by several names including the Witch of

Wellfleet. The ship is called the Whidah in this book but every article the spelling is Whydah. There is a pirate museum on the Cape with artifacts from the he ship wreck. Yes it's a real museum!3 of 3 people found the following review helpful. Ghostly TalesBy Eleanor M CalvertI enjoyed this book so much because my daughter and I vacationed on the Cape in Provence Town. We read about the area and this book was so enjoyable because when it mentioned places, we could imagine the very spots. Thank you Bill Russo for a great book1 of 1 people found the following review helpful. Four StarsBy BevMr. Russo gave an interesting talk and I had to buy his books.

Historic Cape Cod has 15 towns, stretching from Bourne to Provincetown. Each town and village has ghosts and many stories to tell about them. In this book, the author has chosen some of the lesser known, but fascinating apparitions, such The Ghost of the 13 Churches - Dr. Abner Hersey: Ahsoo, the Native American girl who sings with a voice of gold but has a face like a fallen log: and the 300 year old parson who sneaks into people's yards to snatch posies from their flower boats. These and many other legends are included by the author, who visited many of the sites himself and not only wrote the stories, but also took a number of the more than two dozens photos that are included in the E-book version. The photos are not included in the print edition. In one of the most fascinating parts of the book, the author describes in narrative and with pictures, the eerie, secluded burial ground of the tribe of Princess Scargo. Because this graveyard is virtually unknown, and hard to find, the author has given specific directions to the compelling site, that overlooks Scargo Lake. Stories from all four parts of Cape Cod are included in this 'must read' collection.

About the AuthorBill Russo had lived in an area of Massachusetts called the Bridgewater Triangle for many years and never knew that it was said to be inhabited by scary swamp creatures until he met one. It happened on a midnight walk. Years later, two film producers read his blog about it and featured him and his story in their documentary, "The Bridgewater Triangle". He also was approached by Discovery channel producers and was featured in the opening segment of Monsters and Mysteries in America - Season two, Episode two. Among his work, are two anthologies featuring the Bridgewater Triangle Universe. One is strictly fiction and the other contains his account of meeting the swamp creature - plus other stories from New England. As a disc jockey, he was the first person to play and promote the trucking classic "Tombstone Every Mile". He counted as a friend, the first man to cross the musical color line, in a 1940s Jazz Band. The "Human Jukebox", who opened for both Elvis and Roy Orbison, was a neighbor of his. Stories of these and other artists are included in "Crossing the Musical Color Line". Bill's background for writing comes from a Boston education at the venerable 'shirt tie' Huntington School for Boys. He followed that up with a study of journalism, music, and broadcasting at the famed Kenmore Square institution, "Grahm Jr. College", where he said he learned more about music from an African American gentleman who was the school's janitor, than he ever could in a classroom. "He introduced me to Gloria Lynne," Bill said. Years after he learned of her, she had a mega hit with "I Wish You Love". One of Grahm's well known graduates was performance artist Andy Kaufman who created his Taxi TV character 'Latka' while at Grahm. Andy also claimed he learned Transcendental Meditation at Grahm, although it was not taught there. But who knows? It could be true. Bill Russo learned music from the Janitor. Maybe someone in bookkeeping was a 'guru' and gave Andy the secrets of TM. At various times during his career, Russo was a New England Newspaper Editor, a Disc Jockey, and a Radio newswriter and newscaster for a number of stations. He also has had stints as an iron worker, and a low level manager for a major mail order clothing retailer. One of his favorite jobs was partnering with Bill Barry, the inventor of a jewelry polish called Clear Bright n Shiny. They 'Bills' as they called toured the East Coast selling the product in demo shows in BJ's Wholesale Clubs.
